

Instructions For Remote Control (NO Battery Box Needed)

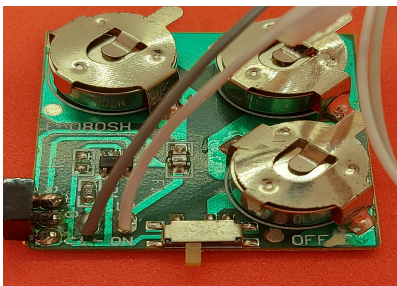

(Please refer to the PDF file on how to determine +ve and -ve wires on LED)

1. Connect LED with receptacle (white with grey). White wire on receptacle is POSITIVE; Grey wire on receptacle is NEGATIVE.

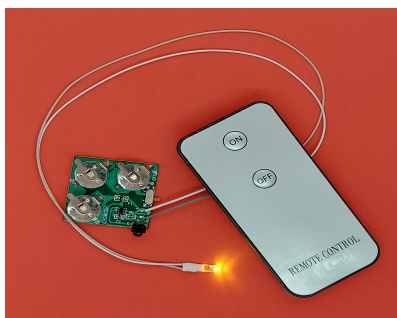

2. Wrap the exposed wires with tape.

3. Insert 3x LR44 batteries (INCLUDED) into the slots and toggle the white switch to ON.

4. Remove the plastic film at the bottom of the remote control.

5. Use the buttons on the remote control to easily turn lights ON/OFF.
