

Instructions For Remote Control (WITH Battery Box)

(Please refer to the PDF file on how to determine +ve. and -ve LED wires)

1. Connect the white and grey wires from receptacle to LED. White wire from receptacle is POSITIVE. Grey wire from receptacle is NEGATIVE. Wrap exposed wires with tape.

2. Connect red and black wires from receptacle with battery box (red with red; black with black). Wraps exposed wires with tape.

3. Insert batteries into the battery box and switch it to ON. Remove the plastic film at the bottom of the remote control.

4. Use the buttons on the remote control to easily turn lights ON/OFF.
